Knife gate valve HPT

Stafsjö's knife gate valve HPT is made of Titanium and is the reliable solution for process conditions requiring safe and tight shut-off, in combination with excellent corrosion resistance. The valve is bi-directional tight and has a through-going gate for secure shut-off of static and highly concentrated media.

HPT has a two piece valve body in Titanium with purge ports and integrated guiding pads. Other exposed parts as the gate, retainer rings and glands are also made of Titanium. The top work consists of pillars or beams in stainless steel and as standard it is supplied with an epoxy coated double-acting pneumatic cylinder. The valve is modular designed which makes it easy to uphold flexibility and a first-rate operation year after year.

The HPT valve is designed, manufactured, inspected and tested according to the European Pressure Equipment Directive (PED 97/23/EC) category I and II module A1. The valve is CE marked when it is applicable.

The HPT valve is one of four valves in Stafsjö's product range with through-going gate. The HP is a high pressure version of HG while the HL is a slim line version.

Reliable shut-off and bi-directional sealing

The retainer ring system on both sides of the gate makes it independent of flow direction. The through-going gate assures a reliable shut-off of highly concentrated and static media.

A bore with excellent flow characteristics

In open position, the HPT valve's bore has almost no cavity at all, making the flow characteristics really excellent. In this position the PTFE seats are protected by the retainer rings and the gate.

Solid design to preserve a first class sealing

The gate is supported all the way from open to closed position which, together with a proper dimensioned top work, makes the shut-off reliable and repeat-able.

Design data

Sizes	Flange drilling	Face-to-face dimension	ATEX design
DN 200-DN 700	EN 1092 PN 10 JIS B 2238 10K ANSI B16.5 Class 150	Stafsjö manufacturing standard	ATEX 94/ 9/EC II cat 3 G/D for zone 2 and 22 on request

Accessories	Code	Model	Design
Solenoid valve	(SV)	Parker Namur valves for EC 100 - EC 160	G1/4", Mono stable 5/2, Namur series VDI/VDE 3845, 24 V DC/110 V AC/220 V AC, IP 65
		Parker Namur valves for EC 200 - EC 320	G1/2", Mono stable 5/2, Namur series VDI/VDE 3845, 24 V DC/110 V AC/220 V AC, IP 65
Magnetic limit switch	(MagLS)	KITA KT-50R for EC 100 - EC 320	2-wire, 5-240 V AC/DC, IP 65
		KITA KT-50N for EC 100 - EC 320	3-wire, 10-30 V DC, IP 65

The accessories are described in separate data sheets. For advice and information on other accessories or on ATEX-classified ones, please contact Stafsjö or your local representative.

Specify the Stafsjö valve

Stafsjö's valves are modular designed and they can easily be customized with gate, seat and box packings according to media and requirements, as well for actuators and accessories. Below are examples of how you can specify your Stafsjö valve. Further information is available on www.stafsjo.com.

²⁾ All electronics must be specified in detail.

Part list

Pos.	Detail	Material (Type)
1	Hand wheel	Stainless steel (EN 1.4308/SS 2333) ≥ Ø 400 Epoxy coated cast iron (EN-JL1030/GG20)
2	Yoke	Stainless steel (EN 1.4436/SS 2343)
